For Research Use Only

FITC Monoclonal antibody, PBS Only

Catalog Number: 68132-1-PBS

Basic Information

Catalog Number:

68132-1-PBS

Size:

2000 μ g/ml

Source: Mouse

Isotype:

IgG2a

GenBank Accession Number:

GeneID (NCBI):

Full Name:

Purification Method: Protein A purification

CloneNo.: 3C10A1

Applications

Tested Applications:

WB, ELISA

Species Specificity:

chemical compound, fitc

Background Information

Fluorescein isothiocyanate (FITC) is a derivative of fluorescein used in wide-ranging applications. It is the original fluorescein molecule functionalized with an isothiocyanate reactive group (-N=C=S), replacing a hydrogen atom on the bottom ring of the structure. It is typically available as a mixture of isomers, fluorescein 5-isothiocyanate (5-FITC) and fluorescein 6-isothiocyanate (6-FITC). FITC is reactive towards nucleophiles including amine and sulfhydryl groups on proteins. CAS number of FITC: 27072-45-3 (mixture); 3326-32-7, 5-isomer; 18861-78-4 (6-isomer). This mouse monoclonal antibody detects the FITC only. This antibody can be coated in the plate to capture the FITC conjugated protein or antibody.

Storage

Storage:

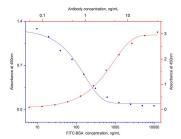

Store at -80°C.

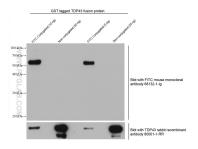

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

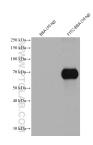

Storage Buffer:

PBS Only

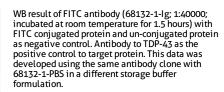

Selected Validation Data

Indirect ELISA and competitive ELISA results show that this antibody is specific to FITC. Indirect ELISA was performed by coating FITC conjugated BSA at Ong/well followed by blocking with 1% BSA. Serial diluted primary antibody was added to the plates and incubated at 37°C. HRP-goat anti-mouse was used for detection (red curve, refer to top X-right Y axis). Competitive ELISA was performed similarly except that different concentration of FITC (active group been

WB results of FITC antibody (68132-1-lg, 1:10000) with BSA and FITC conjugated BSA. This data was developed using the same antibody clone with 68132-1-PBS in a different storage buffer formulation.
