For Research Use Only

## COMT Monoclonal antibody, PBS Only proteintech®

Catalog Number: 68181-1-PBS

**Basic Information** 

Catalog Number:

GenBank Accession Number:

Purification Method:

68181-1-PBS

GeneID (NCBI):

Protein G purification CloneNo.:

Size: 1 mg/ml

1312
UNIPROT ID:

BC000419

1A1A4

Source: Mouse

Full Name:

Isotype: IgG1

AG6502

cate chol-O-methyl transfer as e

Immunogen Catalog Number:

Calculated MW: 30 kDa

P21964

30 kDa

Observed MW:

Observed M 28-30 kDa

**Applications** 

Tested Applications:

WB, IF, Indirect ELISA

Species Specificity:

Human, pig, rat, mouse

## **Background Information**

Catechol O-methyltransferase (COMT) is an important enzyme that catalyzes O-methylation and inactivation of metabolically active catechol-containing bioactive molecules and drugs. The mammalian COMT enzyme exists in soluble form (24-26 kDa) and membrane-bound form (28-30 kDa), which are encoded by a single gene utilizing different promoters.

Storage

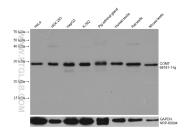

Storage:

Store at -80°C.

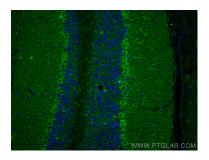

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

PBS Only

## **Selected Validation Data**

Various lysates were subjected to SDS PAGE followed by western blot with 68181-1-1g (COMT antibody) at dilution of 1:10000 and incubated at room temperature for 1.5 hours. The membrane was stripped and reblotted with HRP-conjugated GAPDH Monoclonal antibody (HRP-60004) as loading control. This data was developed using the same antibody clone with 68181-1-PBS in a different storage buffer formulation.

Immunofluorescent analysis of (4% PFA) fixed mouse cerebellum tissue using COMT antibody (68181-1-lg, Clone: 1A1A4) at dilution of 1:400 and Coralite®488-Conjugated AffiniPure Goat Anti-Mouse IgG(H+L). This data was developed using the same antibody clone with 68181-1-PBS in a different storage buffer formulation.
