For Research Use Only

CC2D1A Monoclonal antibody, PBS Only

Catalog Number: 68334-1-PBS

Basic Information

Catalog Number:

68334-1-PBS

BC064981

GenBank Accession Number:

Purification Method:

Size:

GeneID (NCBI):

Protein G purification

1 mg/ml Source:

54862 **UNIPROT ID:** CloneNo.: 1C11G2

Mouse Isotype: Q6P1N0 Full Name:

lgG1

coiled-coil and C2 domain containing

Immunogen Catalog Number:

AG10363

Calculated MW: 951 aa. 104 kDa

Observed MW: 130 kDa

Applications

Tested Applications:

WB,Indirect ELISA,IHC,IF

Species Specificity:

Human, Mouse, Rat

Background Information

CC2D1A (coiled-coil and C2 domain-containing 1A), also known as Freud-1, Aki1 or TAPE (TBK1-associated protein $in \, endolyso somes), is \, a \, evolutionary \, conserved \, protein \, located \, in \, different \, subcellular \, compartments, \, including \, the \, conserved \, protein \, located \, in \, different \, subcellular \, compartments, \, including \, the \, conserved \, protein \, located \, in \, different \, subcellular \, compartments, \, including \, the \, conserved \, protein \, located \, in \, different \, subcellular \, compartments, \, including \, the \, conserved \, protein \, located \, in \, different \, subcellular \, compartments, \, including \, the \, conserved \, protein \, located \, in \, different \, subcellular \, compartments, \, including \, the \, conserved \, protein \, located \, in \, different \, subcellular \, compartments, \, including \, the \, conserved \, protein \, located \, in \, different \, subcellular \, compartments, \, including \, the \, conserved \, protein \, located \, in \, different \, subcellular \, compartments, \, including \, the \, conserved \, protein \, located \, in \, different \, conserved \, protein \, located \, conserved \, conserved \, conserved \, protein \, conserved \, co$ nucleus, centrosome, and endolysosomes. It acts as a scaffold protein that interacts with various proteins and plays diverse biological roles. Mutations in CC2D1A have been linked to nonsyndromic mental retardation (NMSR) and generate a truncated 85-kDa product. Several isoforms of CC2D1A proteins have also been described: 120/130-kDa doublet of long isoform and 67 kDa short isoform. The short isoform of CC2D1A has been identified as the predominant is oform in rodent cells, while the long is oform is more abundant in human cells. Recently it has been abundant in human cells abundant in human cells abundant in human cells. The contract contract is a support of the contract contract in human cells abundant in human cells. The contract contract is a support of the contract contract in human cells are not contract in human cells. The contract contract is a support of the contract in human cells are not contract in human cells. The contract is a support of the contract in human cells are not contract in human cells are not contract in human cells. The contract is a support of the contract in human cells are not contract in human cells are not contract in human cells. The contract is a support of the contract in human cells are not contract in human cells. The contract is a support of the contract in human cells are not contract in human cells are nreported that CC2D1A/TAPE is the first innate immune regulator implicated in both TLR and RLR signaling at a very

Storage

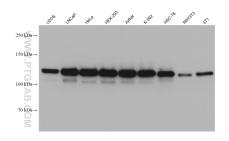

Storage:

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

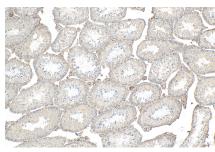

Storage Buffer:

PBS Only

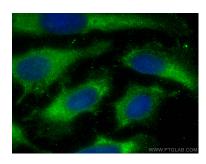

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 68334-1-lg (CC2D1A antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 68334-1-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffinembedded mouse testis tissue slide using 68334-1-Ig (CC2D1A antibody) at dilution of 1:1000 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 68334-1-PBS in a different storage buffer formulation.

Immunofluorescent analysis of (-20°C Methanol) fixed Hela cells using CC2D1A antibody (68334-1-1g, Clone: 1C11G2) at dilution of 1:1000 and CoraLite® 488-Conjugated AffiniPure Goat Anti-Mouse IgG(H+L). This data was developed using the same antibody clone with 68334-1-PBS in a different storage buffer formulation.
