

For Research Use Only

RPAIN Monoclonal antibody, PBS Only

Catalog Number: 68546-1-PBS

Basic Information

Catalog Number: 68546-1-PBS	GenBank Accession Number: BC004451	Purification Method: Protein G purification
Size: 1 mg/ml	GeneID (NCBI): 84268	CloneNo.: 2D8E3
Source: Mouse	UNIPROT ID: Q86UA6	
Isotype: IgG1	Full Name: RPA interacting protein	
Immunogen Catalog Number: AG7844	Calculated MW: 25 kDa	
	Observed MW: 25 kDa	

Applications

Tested Applications:
WB, Indirect ELISA

Species Specificity:
Human

Background Information

Replication protein A (RPA) is a eukaryotic single-stranded DNA binding protein that is essential for DNA replication, repair, and recombination, and human RPA interacting protein α (hRIP α) is the nuclear transporter of RPA. RPAIN was originally identified as a nuclear transporter of RPA in *Xenopus* (PMID: 23010595). The human RIP α gene encodes several splice isoforms, of which hRIP α and hRIP β are the major translation products in vivo. hRIP α transports RPA into the nucleus by shuttling between the cytoplasm and nucleus while hRIP β is localized in promyelocytic leukemia (PML) nuclear bodies.

Storage

Storage:
Store at -80°C .
The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:
PBS Only

For technical support and original validation data for this product please contact:

W: ptgcn.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 68546-1-Ig (RPAIN antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 68546-1-PBS in a different storage buffer formulation.
