

For Research Use Only

CTSA Recombinant antibody, PBS Only

Catalog Number: 80272-3-PBS

Basic Information

Catalog Number:

80272-3-PBS

Concentration:

1000 µg/ml

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG7073

GenBank Accession Number:

BC000597

GeneID (NCBI):

5476

UNIPROT ID:

P10619

Full Name:

cathepsin A

Calculated MW:

54 kDa

Observed MW:

54-60, 32, 20 kDa

Purification Method:

Protein A purification

CloneNo.:

251086D9

Applications

Tested Applications:

WB, Indirect ELISA

Species Specificity:

human

Background Information

CTSA is also named as PPGB(protective protein for beta-galactosidase), PPCA(protective protein cathepsin A), cathepsin A, carboxypeptidase C, carboxypeptidase L and belongs to the peptidase S10 family. It is a ubiquitously expressed multifunctional enzyme, with deamidase, esterase, and carboxypeptidase activities and a preference for substrates with hydrophobic amino acid residues at the P1-prime position. It can be cleaved into the following 2 chains and defects in CTSA are the cause of galactosialidosis (GSL). This protein has 2 glycosylation sites. CTSA is synthesized as a 54-kDa precursor protein and composed of 32- and 20-kDa subunits linked together by disulfide bonds(PMID: 16461364,19574551).

Storage

Storage:

Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:

PBS only, pH7.3

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 80272-3-RR (CTSA antibody) at dilution of 1:3000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 80272-3-PBS in a different storage buffer formulation.

Biolayer interferometry (BLI) kinetic assays of 80272-3-RR against Human CTSA were performed. The affinity constant is 0.717 nM.
