For Research Use Only

ADRP Recombinant antibody

Catalog Number:80362-3-RR

Basic Information

Catalog Number:

GenBank Accession Number: BC005127

Purification Method:

80362-3-RR

GeneID (NCBI):

Protein A purification

Size: 800 µg/ml

123 UNIPROT ID: CloneNo.: 230274D9

Source: Rabbit Isotype:

Q99541 Full Name:

IgG

adipose differentiation-related

protein

AG7539

Calculated MW:

48 kDa

Observed MW:

48 kDa

Applications

Tested Applications:

Immunogen Catalog Number:

ELISA

Species Specificity:

human

Background Information

ADRP (adipocyte differentiation related protein) also known as ADFP, adipophilin, or perilipin-2, is a member of PAT family which is responsible for the transportation of lipids and the formation of lipid droplets. ADRP is localized on the surface of lipid droplets in a variety of tissues and cell lines. ADRP is not detected in undifferentiated cells but increases rapidly to high levels when adipocyte precursors differentiate into adipocytes. Anti-ADRP antibody is a reliable and sensitive marker for lipid droplet. Enhanced expression of ADRP is linked to diseases with abnormal lipid storage, including hepatic steatosis, atherosclerosis and diabetes. Immunohistochemistry of ADRP may facilitate histomorphological diagnosis of these diseases.

Storage

Storage:

Store at -20°C. Stable for one year after shipment.

Storage Buffe

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data
