

DMT1 Recombinant antibody, PBS Only

Catalog Number: 81609-1-PBS

Basic Information

Catalog Number: 81609-1-PBS	GenBank Accession Number: BC002592	Purification Method: Protein A purification
Size: 1mg/ml	GeneID (NCBI): 4891	CloneNo.: 1113
Source: Rabbit	UNIPROT ID: P49281	
Isotype: IgG	Full Name: solute carrier family 11 (proton-coupled divalent metal ion transporters), member 2	
Immunogen Catalog Number: AG14314	Calculated MW: 568 aa, 62 kDa	
	Observed MW: 70 kDa	

Applications

Tested Applications:
Indirect ELISA, IP, WB

Species Specificity:
rat, mouse, human

Background Information

SLC11A2 (also known as DMT1, Nramp2, and DCT1) is a member of the divalent cation transporters that plays a central role in iron homeostasis. SLC11A2 is widely expressed in many tissues including brain, kidney, testis, duodenum and placenta. As a membrane protein, SLC11A2 is localized on the apical membrane of enterocytes as well as in transferrin-cycle endosomes. Four isoforms of SLC11A2 exist due to the alternative splicing. They differ at the NH2 and COOH termini but share a common central domain. A variety of molecular weights of SLC11A2 in western blot analysis, ranging from 50 to 100 kDa, has been reported in different cells and species. The differences in molecular weights may be attributed to the level of glycosylation, proteolysis, or the membrane protein itself. This antibody detected various forms of SLC11A2 of 45-100 kDa.

Storage

Storage:
Store at -80°C.
The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:
PBS Only

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 81609-1-RR (DMT1 antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 81609-1-PBS in a different storage buffer formulation.

IP result of anti-DMT1 (IP:81609-1-RR, 4ug; Detection:81609-1-RR 1:2000) with HEK-293 cells lysate 1480 ug. This data was developed using the same antibody clone with 81609-1-PBS in a different storage buffer formulation.

Biolayer interferometry (BLI) kinetic assays of 81609-1-RR against Human DMT1 were performed. The affinity constant is 1.93 nM.
