

For Research Use Only

NESP55,GNAS Recombinant monoclonal antibody, PBS Only

Catalog Number:81802-2-PBS

Basic Information

Catalog Number:

81802-2-PBS

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG0197

GenBank Accession Number:

BC002722

GeneID (NCBI):

2778

UNIPROT ID:

P63092

Full Name:

GNAS complex locus

Calculated MW:

45 kDa

Observed MW:

46 kDa

Purification Method:

Protein A purification

CloneNo.:

251463D5

Applications

Tested Applications:

WB, IF/ICC, Indirect ELISA

Species Specificity:

human, mouse, rat

Background Information

Guanine nucleotide binding protein (G protein), alpha stimulating activity polypeptide 1 (GNAS1) is the ubiquitously expressed heterotrimeric G protein that couples receptors to the effector enzyme adenylyl cyclase and is required for receptor-stimulated intracellular cAMP generation. Mutations of Gs(alpha) residues involved in the GTPase reaction that lead to constitutive activation are present in endocrine tumors, fibrous dysplasia of bone, and McCune-Albright syndrome. The near two bands represent two different isoforms. The expression profile/ molecular weight observed are consistent with what has been described in the literature (PMID : 3258290).

Storage

Storage:

Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:

PBS only, pH7.3

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 81802-2-RR (NESP55,GNAS antibody) at dilution of 1:20000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 81802-2-PBS in a different storage buffer formulation.

WB result of NESP55,GNAS antibody (81802-2-RR; 1:200000; incubated at room temperature for 1.5 hours) with sh-Control and sh-NESP55,GNAS transfected MCF-7 cells. This data was developed using the same antibody clone with 81802-2-PBS in a different storage buffer formulation.

Immunofluorescent analysis of (4% PFA) fixed MCF-7 cells using NESP55,GNAS antibody (81802-2-RR, Clone: 251463D5) at dilution of 1:400 and CoraLite®488-Conjugated Goat Anti-Rabbit IgG(H+L) (SA00013-2). This data was developed using the same antibody clone with 81802-2-PBS in a different storage buffer formulation.

Biolayer interferometry (BLI) kinetic assays of 81802-2-RR against Human NESP55,GNAS were performed. The affinity constant is below 1 pM.
