For Research Use Only

WT1 Recombinant antibody

Catalog Number:82525-1-RR

Purification Method:

CloneNo.:

2J13

Positive Controls:

WB: K-562 cells, MCF-7 cells

Protein A purification

Recommended Dilutions:

IP 0.5-4.0 ug for 1.0-3.0 mg of total

WB 1:2000-1:10000

protein lysate

Basic Information

Catalog Number: GenBank Accession Number:

 82525-1-RR
 BC032861

 Concentration:
 GeneID (NCBI):

 500 ug/ml
 7490

 Source:
 UNIPROT ID:

 Rabbit
 P19544

IgG Wilms tumor 1

Immunogen Catalog Number: Calculated MW:

AG19541 449 aa, 49 kDa, 57 kDa

Observed MW: 52-55 kDa

Tested Applications:

Species Specificity: IP : K-562 cells,

Full Name:

human, mouse

Background Information

The WT1 gene encodes a zinc finger DNA-binding protein that acts as a transcriptional activator or repressor depending on the cellular or chromosomal context, and it is required for the normal formation of the genitourinary system and mesothelial tissues. WT1 inhibits apoptosis through p53 and Bcl-2 and also inhibits the differentiation of leukemic cells. The function of WT1 may be isoform-specific: isoforms lacking the KTS motif may act as transcription factors. Isoforms containing the KTS motif may bind mRNA and play a role in mRNA metabolism or splicing. Isoform 1 has a lower affinity for DNA and can bind RNA. WT1 exists some isoforms with a range of molecular weight is 33-50 kDa.

Storage

Applications

Storage:

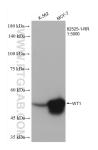

Isotype:

WB, IP, ELISA

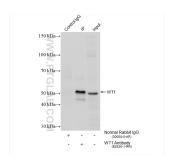

Store at -20°C. Stable for one year after shipment. Storage Buffer:

PBS with 0.02% sodium azide and 50% glycerol Aliquoting is unnecessary for -20° C storage

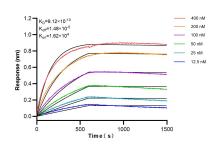

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 82525-1-RR (WT 1 antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours.

IP result of anti-WT1 (IP:82525-1-RR, 4ug; Detection:82525-1-RR 1:1000) with K-562 cells lysate 1600 ug.

Biolayer interferometry (BLL) kinetic assays of 82525-1-RR against Human WT1 were performed. The affinity constant is 0.912 nM.
