For Research Use Only

TTL Recombinant antibody, PBS Only

Catalog Number:82763-5-PBS Featured Product

Basic Information

Catalog Number:

GenBank Accession Number:

Purification Method: Protein A purification

82763-5-PBS

GeneID (NCBI):

BC036819

Q8NG68 Full Name: CloneNo.:

Size: 1 mg/ml Source:

150465 UNIPROT ID:

3P9

Rabbit Isotype:

tubulin tyrosine ligase

Immunogen Catalog Number: AG4526

Calculated MW: 377 aa, 43 kDa

Observed MW:

43 kDa

Applications

Tested Applications:

WB, Indirect ELISA

Species Specificity:

human, mouse, rat

Background Information

Tubulin-tyrosine ligase (TTL) is the enzyme responsible for the reversible addition of a tyrosine residue at the carboxyl end of alpha-tubulin. TTL forms stable complexes with tubulin and inhibit tubulin polymerization. TTL is frequently suppressed during tumor progression with resulting accumulation of detyrosinated alpha-tubulin in tumor cells. TTL suppression in human cancers is associated with increased tumor aggressiveness.

Storage

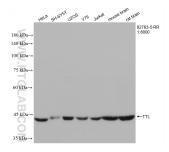

Storage:

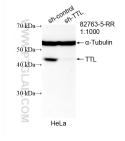

Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

PBS Only

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 82763-5-RR (TTL antibody) at dilution of 1:8000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 82763-5-PBS in a different storage buffer formulation.

WB result of TTL antibody (82763-5-RR; 1:1000; incubated at room temperature for 1.5 hours) with sh-Control and sh-TTL transfected HeLa cells. This data was developed using the same antibody clone with 82763-5-PBS in a different storage buffer formulation.
