Background Information

GPX4 (Phospholipid hydroperoxide glutathione peroxidase, mitochondrial) protects cells against membrane lipid peroxidation and cell death. Required for normal sperm development and male fertility. It has two isoforms about 20KDa and 22KDa, respectively. GPX4 is a monomer, but it has a tendency to form higher mass oligomers (PMID:17630701). 82822-2-RR is human specific.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 82822-2-RR (GPX4 antibody) at dilution of 1:7500 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 82822-2-PBS in a different storage buffer formulation.

WB result of GPX4 (Human Specific) antibody (82822-2-RR; 1:2000; incubated at room temperature for 1.5 hours) with sh-Control and sh-GPX4 (Human Specific) transfected HEK-293 cells. This data was developed using the same antibody clone with 82822-2-PBS in a different storage buffer formulation.

Biolayer interferometry (BLI) kinetic assays of 82822-2-RR against Human GPX4 (Human Specific) were performed. The affinity constant is below 1 pM.
