GSDMA Recombinant antibody

Catalog Number:82920-2-RR

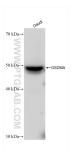

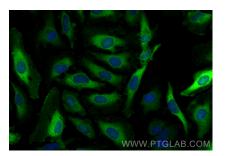

Rabbit Q96QA5 WB 1:5000-1:50000 Isotype: Full Name: IF/ICC 1:50-1:500 IgG gasdermin A Immunogen Catalog Number: Catculated MW: AG24407 445 aa, 49 kDa Observed MW: 49 kDa Observed MW: 49 kDa Applications Tested Applications: WB: Daudi cells, WB, IF/ICC, ELISA WB: Daudi cells, Species Specificity: IF/ICC : HeLa cells, human Gasdermins, a family of five pore-forming proteins (GSDMA-GSDME) in humans expressed predom skin, mucosa and immune sentinel cells, are key executioners of inflammatory cell death (pyropti recruits immune cells to infection sites and promotes protective immunity. GSDMA was predicted phosphatidylinositol-4,5-bisphosphate binding activity, phosphatidylinositol-4-phosphate binding activity. Involved in apoptotic process. Storage: Storage: Storage Buffer: Storage Buffer:	Basic Information	Catalog Number: 82920-2-RR	GenBank Accession Number: BC 109197	Purification Method: Protein A purfication

Store at -20°C. Stable for one year after shipment. Storage Buffer:	ckground Informatior	Gasdermins, a family of five pore-forming proteins (GSDMA-GSDME) in humans expressed predominantly in the skin, mucosa and immune sentinel cells, are key executioners of inflammatory cell death (pyroptosis), which recruits immune cells to infection sites and promotes protective immunity. GSDMA was predicted to enable phosphatidylinositol-4,5-bisphosphate binding activity, phosphatidylinositol-4-phosphate binding activity, and phosphatidylserine binding activity. Involved in apoptotic process.		
PDS With 0.02% Southin azide and 50% glyterol pr 7.5.	Storage	Store at -20°C. Stable for one year	·	
Aliquoting is unnecessary for -20°C storage		Aliquoting is unnecessary for -20°C storage

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Daudi cells were subjected to SDS PAGE followed by western blot with 82920-2-RR (GSDMA antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. Immunofluorescent analysis of (-20°C Ethanol) fixed HeLa cells using GSDMA antibody (82920-2-RR, Clone: 230161C5) at dilution of 1:200 and Multi-rAb CoraLite ® Plus 488-Goat Anti-Rabbit Recombinant Secondary Antibody (H+L) (RGAR002). Biolayer interferometry (BLI) kinetic assays of 82920-2-RR against Human GSDMA were performed. The affinity constant is below 1 pM.
