For Research Use Only

MAX Recombinant antibody

Catalog Number:82958-1-RR

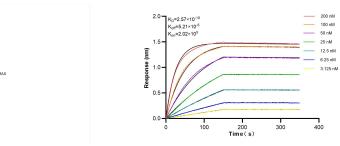

Basic Information	Catalog Number: 82958-1-RR	GenBank Accession Number: BC003525	Purification Method: Protein A purification
	Concentration: 800 ug/ml	GenelD (NCBI): 4149	CloneNo.: 230215E3
	Source: Rabbit	UNIPROT ID: P61244	Recommended Dilutions: WB 1:1000-1:8000
	lsotype: IgG	Full Name: MYC associated factor X	
	Immunogen Catalog Number: AG0680	Calculated MW: 18 kDa	
		Observed MW: 22 kDa	
Applications	Tested Applications:	Positive Controls:	
	WB, ELISA Species Specificity: human	WB : PC-3	cells,
Background Information	Max, a member of MAX family, contains a basic helix-loop-helix (bHLH) domain, is a transcription regulator. MAX can form a sequence-specific DNA-binding protein complex with MYC or MAD which recognizes the core sequence 5'- CAC[GA]TG-3'. The MYC-MAX complex is a transcriptional activator, while the MAD-MAX complex is a repressor. MAX could dimerizated with another bHLH protein to form a heterodimer, such MYC or MAD. Thus bands recognized by this antibody much larger than predicted.		
Storage	Storage: Store at -20°C. Stable for one year after shipment. Storage Buffer: PBS with 0.02% sodium azide and 50% glycerol pH 7.3. Aliquoting is unnecessary for -20°C storage

Various lysates were subjected to SDS PAGE followed by western blot with 82958-1-RR (MAX antibody) at dilution of 1:4000 incubated at room temperature for 1.5 hours. Biolayer interferometry (BLL) kinetic assays of 82958-1-RR against Human MAX were performed. The affinity constant is 0.257 nM.
