

For Research Use Only

TPR Recombinant antibody, PBS Only

Catalog Number: 83177-5-PBS

Basic Information

Catalog Number:

83177-5-PBS

Size:

1 mg/ml

Source:

Rabbit

Isotype:

IgG

GenBank Accession Number:

NM_003292

GeneID (NCBI):

7175

UNIPROT ID:

P12270

Full Name:

translocated promoter region (to activated MET oncogene)

Calculated MW:

267 kDa

Observed MW:

~270 kDa

Purification Method:

Protein A purification

CloneNo.:

230413A2

Applications

Tested Applications:

WB, IHC, IF/ICC, ELISA

Species Specificity:

human

Background Information

Nucleoporin TPR was originally identified as the oncogenic activator of the met, raf, and trk protooncogenes. TPR is a large 270 kDa protein with a bipartite structure consisting of a ~1600-residue α -helical coiled-coil N-terminal domain and a highly acidic non-coiled ~800 amino acid carboxy terminus (PMID: 22253824). TPR is localized exclusively to intranuclear filaments associated with the nucleoplasmic side of the NPC, by directly binding to Nup153 (PMID: 12802065).

Storage

Storage:

Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:

PBS Only

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 83177-5-RR (TPR antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 83177-5-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffin-embedded mouse testis tissue slide using 83177-5-RR (TPR antibody) at dilution of 1:200 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 83177-5-PBS in a different storage buffer formulation.

Immunofluorescent analysis of (4% PFA) fixed HeLa cells using TPR antibody (83177-5-RR, Clone: 230413A2) at dilution of 1:200 and CoraLite®488-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L) (SA00013-2), CL594-Phalloidin (red). This data was developed using the same antibody clone with 83177-5-PBS in a different storage buffer formulation.
