

For Research Use Only

CMIP Recombinant antibody, PBS Only

Catalog Number: 83381-1-PBS

Basic Information

Catalog Number:

83381-1-PBS

Size:

1 mg/ml

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG3475

GenBank Accession Number:

BC038113

GeneID (NCBI):

80790

UNIPROT ID:

Q8IY22

Full Name:

c-Maf-inducing protein

Calculated MW:

86 kDa

Observed MW:

69 kDa

Purification Method:

Protein A purification

CloneNo.:

240059C12

Applications

Tested Applications:

WB, IHC, FC (Intra), Indirect ELISA

Species Specificity:

human

Background Information

The gene of CMIP was isolated from one patient of minimal change nephrotic syndrome. The gene encodes two isoforms: CMIP and truncated CMIP. The predicted CMIP and truncated CMIP proteins contain 739 and 679 amino acids and have calculated molecular masses of 85 and 75 kD, respectively. The two isoforms have different distribution and expression pattern.

Storage

Storage:

Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:

PBS Only

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

human peripheral blood platelets were subjected to SDS PAGE followed by western blot with 83381-1-RR (CMIP antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 83381-1-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffin-embedded human intrahepatic cholangiocarcinoma tissue slide using 83381-1-RR (CMIP antibody) at dilution of 1:200 (under 20x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 83381-1-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffin-embedded human intrahepatic cholangiocarcinoma tissue slide using 83381-1-RR (CMIP antibody) at dilution of 1:200 (under 20x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 83381-1-PBS in a different storage buffer formulation.

1x10⁶ A549 cells were intracellularly stained with 0.25 ug CMIP Recombinant Antibody (83381-1-RR, Clone:240059C12) and APC-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L)(red), or 0.25 ug Isotype Control (blue). Cells were fixed and permeabilized with True-Nuclear Transcription Factor Buffer Set. This data was developed using the same antibody clone with 83381-1-PBS in a different storage buffer formulation.
