For Research Use Only

KMO Recombinant antibody, PBS Only

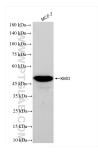

Catalog Number:83812-1-PBS

Basic Information	Catalog Number: 83812-1-PBS	GenBank Accession Number: BC005297	Purification Method: Protein A purfication
	Concentration:	GenelD (NCBI):	CloneNo.:
	1 mg/ml	8564	240586D3
	Source:	UNIPROT ID:	
	Rabbit	015229	
	lsotype:	Full Name:	
	IgG	kynurenine 3-monooxygenase	
	Immunogen Catalog Number: AG35029	(kynurenine 3-hydroxylase)	
		Calculated MW: 486 aa, 56 kDa	
		Observed MW:	
		52-56 kDa	
Applications	Tested Applications: WB, IHC, FC (Intra), ELISA Species Specificity: human, mouse		
Background Information	KMO(Kynurenine 3-monooxygenase) is an NADPH-dependent flavin monooxygenase, catalysing the hydroxylation of the L-kynurenine to form L-3-hydroxykynurenine. KMO is a membrane protein located on the outer membrane of mitochondria. Tissue distribution studies have revealed that, in rats, highest enzyme activity is found in kidney and liver, with brain having the least activity in comparison to peripheral organs(PMID: 9237672).		
Storage	Storage: Store at -80°C. The product is shipped with ice pa Storage Buffer: PBS Only	cks. Upon receipt, store it immediatel	yat-80℃

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

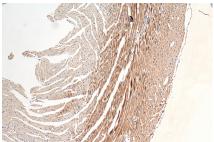

Selected Validation Data

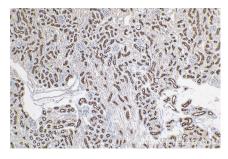

MCF-7 cells were subjected to SDS PAGE followed by western blot with 83812-1-RR (KMO antibody) at dilution of 1:20000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 83812-1-PBS in a different storage buffer formulation.

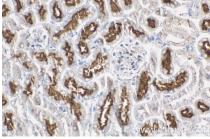

Immunohistochemical analysis of paraffinembedded mouse brain tissue slide using 83812-1-RR (KMO antibody) at dilution of 1:400 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 83812-1-PBS in a different storage buffer formulation.

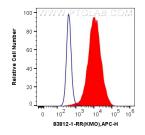

Immunohistochemical analysis of paraffinembedded mouse heart tissue slide using 83812-1-RR (KMO antibody) at dilution of 1:400 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 83812-1-PBS in a different storage buffer formulation.

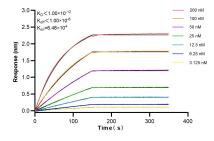

Immunohistochemical analysis of paraffinembedded mouse kidney tissue slide using 83812-1-RR (KMO antibody) at dilution of 1:2000 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 83812-1-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffinembedded mouse kidney tissue slide using 83812-1-RR (KMO antibody) at dilution of 1:2000 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 83812-1-PBS in a different storage buffer formulation.

1x10^6 MCF-7 cells were intracellularly stained with 0.25 ug KMO Recombinant antibody (83812-1-RR, Clone:240586D3) and APC-Conjugated AffiniPure Goat Anti-Rabbit IgG(H+L)(red), or 0.25 ug Isotype Control (blue). Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-C). This data was developed using the same antibody clone with 83812-1-PBS in a different storage buffer formulation.

Biolayer interferometry (BLL) kinetic assays of 83812-1-RR against Human KMO were performed. The affinity constant is below 1 pM.
