Background Information	Annexin A5 (ANXA5), is a member of the structurally related family of annexin proteins some of which have been implicated in membrane-related events along exocytotic and endocytotic pathways. Annexin 5 is a phospholipas A2 and protein kinase C inhibitory protein with calcium channel activity and a potential role in cellular signal transduction, inflammation, growth and differentiation. Annexin 5 has also been described as placental anticoagulant protein I, vascular anticoagulant-alpha, endonexin II, lipocortin V, placental protein 4 and anchorin CII.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 83929-1-RR (ANXA5 antibody) at dilution of 1:8000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 83929-1-PBS in a different storage buffer formulation.

Biolayer interferometry (BLL) kinetic assays of 83929-1-RR against Human ANXA5 were performed. The affinity constant is 13.4 nM.
