For Research Use Only

SLCO2B1 Recombinant antibody

Catalog Number:84353-1-RR

Basic Information

Catalog Number:

GenBank Accession Number:

Purification Method:

84353-1-RR Size: NM_007256 GeneID (NCBI): Protein A purfication

1000 μg/ml

GenelD (NCBI): 11309 CloneNo.: 241199F9

Source:

UNIPROT ID: 094956 Recommended Dilutions:

Rabbit Isotype:

Full Name:

WB 1:5000-1:50000

IgG

solute carrier organic anion

transporter family, member 2B1

Calculated MW:

77 kDa

Applications

Tested Applications:

Positive Controls:

WB, ELISA

Species Specificity:

human, mouse

WB: mouse liver tissue, mouse lung tissue

Background Information

Solute carrier organic anion (SLCO) gene families encode organic anion transport proteins (OATP), which are membrane transporters widely expressed in the human body that influx numerous compounds and drugs including androgens. SLCO2B1 is a member of an organic anion transporter family and has previously been shown to transport a multitude of drugs and steroid hormone conjugates (PMID: 35714613). High expression of SLCO2B1 is known to associate with the resistance to androgen deprivation therapy in prostate cancer (PMID: 29581838). OATP2B1 was insensitive to endoglycosidase H, an enzyme that cleaves only high mannose glycans, as expected for a mature protein undergoing complex glycosylation.

Storage

Storage:

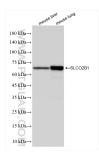

Store at -20°C. Stable for one year after shipment.

Storage Buffer

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 84353-1-RR (SLCO2B1 antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours.
