## **Background Information**

Jagged1 is a type I, membrane- anchored, multidomain protein and a ligand of the Notch receptor. The receptorligand interaction can trigger the Notch signaling and activate transcription factors that play key roles in cell differentiation and morphogenesis. The predicted MW of Jagged1 is 134 kDa, while higher MW around 150-180 kDa had been observed in literations (PMID: 9716576, 9596653).

## Selected Validation Data

HepG2 cells were subjected to SDS PAGE followed by western blot with 84694-1-RR (Jagged1 antibody) at dilution of 1:1000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 84694-1-PBS in a different storage buffer formulation.

Biolayer interferometry (BLL) kinetic assays of 84694-1-RR against Human Jagged1 were performed. The affinity constant is 0.688 nM.
