## **Background Information**

SLC25A1, also known as CIC or CTP, is a mitochondrial citrate transporter that exports citrate from the mitochondrial citrate transporter of the control of the citrate from the mitochondrial citrate transporter of the citrate from the mitochondrial citrate from the citrato the cytosol. SLC25A1 is highly expressed in several tumor types. Recently it has been identified as a novel transcriptional target of mutant p53 and a negative tumor prognostic marker. In addition, defects in SLC25A1 have been found as a cause of combined D-2- and L-2-hydroxyglutaric aciduria. (PMID: 24681808, 23561848)

## **Selected Validation Data**

Various lysates were subjected to SDS PAGE followed by western blot with 84696-1-RR (SLC25A1 antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 84696-1-PBS in a different storage buffer formulation.
