Background Information

Cytochrome P450 8B1 (CYP8B1), also named as CP8B, CYP12 and CYPVIIIB1, is an enzyme required for the synthesis of cholic acid (CA) in the classic bile acid synthesis pathway. CYP8B1 controls biliary balance of cholic acid and chenodeoxycholic acid, ultimately regulating the intestinal absorption of dietary lipids.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 84909-1-RR (CYP8B1 antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 84909-1-PBS in a different storage buffer formulation.
