For Research Use Only

## FANCA Recombinant antibody, PBS Only

Catalog Number:84923-5-PBS

**Basic Information** 

Catalog Number:

GenBank Accession Number: BC008979

**Purification Method:** 

84923-5-PBS

GeneID (NCBI):

Protein A purification

Concentration: 1 mg/ml

2175

CloneNo.: 242600E10

Source: Rabbit

**UNIPROT ID:** 015360

Isotype:

Full Name: Fanconi anemia, complementation

group A Immunogen Catalog Number:

AG2598

Calculated MW:

163 kDa

Observed MW: 163 kDa

**Applications** 

**Tested Applications:** 

WB, Indirect ELISA **Species Specificity:** 

**Background Information** 

FANCA, also named as FAA, FACA and FANCH, is DNA repair protein that may operate in a postreplication repair or a cell cycle checkpoint function. FANCA may be involved in interstrand DNA cross-link repair and in the maintenance of normal chromosome stability. Defects in FANCA are a cause of Fanconi anemia (FA) which is a genetically heterogeneous, autosomal recessive disorder characterized by progressive pancytopenia, a diverse assortment of congenital malformations, and a predisposition to the development of malignancies. The antibody is specific to isoform1 of FANCA.

Storage

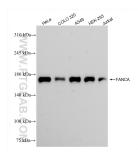

Storage:

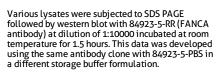

Store at -80°C.

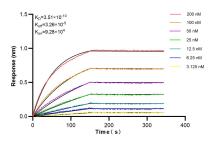

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:

## Selected Validation Data

Biolayer interferometry (BLL) kinetic assays of 84923-5-RR against Human FANCA were performed. The affinity constant is 0.351 nM.
