Background Information

Apolipoprotein H (ApoH), also known as beta2-glycoprotein I (B2-GPI), is a plasma glycoprotein, primarily synthesized in the liver. It has an important function in blood coagulation and clearance of apoptotic bodies from the circulation. ApoH is also an important actor of host innate immune response through its capacity to bind with high affinity to a large panel of pathogens or their proteins. ApoH is a 54 kDa plasma glycoprotein.

Selected Validation Data

human plasma were subjected to SDS PAGE followed by western blot with 84943-2-RR (APOH antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours.

Biolayer interferometry (BLI) kinetic assays of 84943-2-RR against Human APOH were performed. The affinity constant is below 1 pM.
