For Research Use Only

## UFM1 Recombinant antibody, PBS Only

Catalog Number:85068-5-PBS

**Purification Method:** 

CloneNo.:

242505E9

Protein A purification

**Basic Information** 

Catalog Number: 85068-5-PBS

Concentration:

1 mg/ml

Source:
Rabbit
Isotype:

gG ubiquitin-fold modifier 1

Immunogen Catalog Number:Calculated MW:AG866785 aa, 9 kDaObserved MW:

9-12 kDa

BC005193

51569

P61960 Full Name:

GeneID (NCBI):

**UNIPROT ID:** 

GenBank Accession Number:

**Applications** 

Tested Applications: WB, Indirect ELISA Species Specificity: human

Background Information

UFM1 (Ubiquitin-fold modifier 1) is a ubiquitin-like protein covalently conjugated with intracellular proteins through UFMylation (modification by UFM1), a process similar to ubiquitylation (PMID: 38141606). UFM1 is conjugated to its target proteins by E1-like activating enzyme UBE1DC1 and E2-like conjugating enzyme UFC1 in a manner analogous to ubiquitylation (PMID: 28234446; 33066455). At the molecular level, UFMylation is an important mediator of the protein function. Dysregulation of the UFM1 system, e.g., the knockout of UFMylation components, disturbs proteome homeostasis and triggers endoplasmic reticulum stress. Such changes are linked to developmental disorders, tumorigenesis, tissue injury, inflammation, and several hereditary neurological syndromes (PMID: 36932998).

Storage

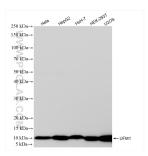

Storage:

Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer: PBS Only

## Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 85068-5-RR (UFM1 antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 85068-5-PBS in a different storage buffer formulation.
