For Research Use Only

GPX8 Recombinant antibody

Catalog Number:85120-1-RR

Basic Information

Catalog Number: GenBank Accession Number: 85120-1-RR BC029424

GeneID (NCBI): 493869 **UNIPROT ID:** Q8TED1

Full Name: glutathione peroxidase 8 (putative)

Calculated MW:

Immunogen Catalog Number: AG9930 209 aa, 24 kDa Observed MW:

24 kDa

Applications

Tested Applications:

WB, ELISA

Concentration:

1000 $\,\mu$ g/ml

Source: Rabbit

Isotype:

Species Specificity: human, mouse, rat

Positive Controls:

WB: HeLa cells, HEK-293 cells, U-87 MG cells, U2OS

Purification Method:

CloneNo.:

242769C6

Protein A purification

Recommended Dilutions:

WB 1:5000-1:50000

cells, NIH/3T3 cells, rat uterus tissue

Background Information

GPX8(Probable glutathione peroxidase 8) is also named as GSHPx-8 and belongs to the glutathione peroxidase family. Glutathione peroxidase (GPx) reduces hydroperoxides, including hydrogen peroxides, in the presence of reduced glutathione as a means of protecting organisms from oxidative damage. Several GPx isozymes have been identified in animal cells and these have been classified into different groups according to their cellular location and substrate specificity. In humans, eight types of GPx have been identified from GPx1 to GPx8. The full length GPX8 has 209 amino acids and the molecular weight is 24 kDa.

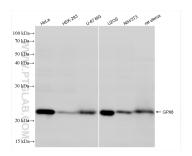

Storage

Store at -20°C. Stable for one year after shipment.

PBS with 0.02% sodium azide and 50% glycerol pH 7.3.

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 85120-1-RR (GPX8 antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours.
