For Research Use Only

## TRPC4 Recombinant antibody, PBS Only

Catalog Number:85334-1-PBS

**Purification Method:** 

Protein A purification

CloneNo.:

242444D7

**Basic Information** 

Catalog Number: GenBank Accession Number: 85334-1-PBS BC104725

GeneID (NCBI): Concentration: 1 mg/ml 7223

**UNIPROT ID:** Source: Rabbit Q9UBN4 Full Name: Isotype:

transient receptor potential cation channel, subfamily C, member 4 Immunogen Catalog Number:

AG15698 Calculated MW:

977 aa. 112 kDa

**Applications** 

**Tested Applications:** IF/ICC, Indirect ELISA Species Specificity: human

## **Background Information**

TRPC4 (Transient Receptor Potential Paradigm 4) is a non-selective calcium channel protein widely found in the nervous system and cardiovascular system. TRPC4 regulates intracellular calcium levels through the activation of  $signaling\ pathways\ mediated\ by\ Gq/11\ and\ Gi/o-coupled\ receptors, and\ is\ involved\ in\ neurotransmission,\ neuronal$ excitability, and vascular endothelial cell function. In the nervous system, TRPC4 is associated with neuropsychiatric disorders such as depression and anxiety, and its inhibitors show antidepressant and anxiolytic potential. In the cardiovascular system, TRPC4 affects vascular permeability and diastolic function by regulating calcium ion inward flow and plays an important role in hypoxia-induced pulmonary hypertension. In addition, TRPC4 is involved in thermore gulation, sensing changes in internal temperature to regulate the drop in body and the property of the properttemperature. aberrant expression of TRPC4 is associated with a variety of diseases, making it a potential therapeutic target!

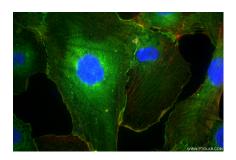

Storage

Storage: Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C Storage Buffer:

PBS Only

## Selected Validation Data

Immunofluorescent analysis of (4% PFA) fixed HUVEC cells using TRPC4 antibody (85334-1-RR, Clone: 242444D7) at dilution of 1:300 and Coralite® 488-Conjugated Goat Anti-Rabbit IgG(H+L) (SA00013-2), CL594-Phalloidin (red). This data was developed using the same antibody clone with 85334-1-PBS in a different storage buffer formulation.
