Background Information

Chromogranin B is also named as Secretogranin-1, Sgl, CgB, CHGB and SCG1. CHGB, a secretory granule protein, inserts itself into membrane and forms a chloride-conducting channel (PMID: 30456382). Native CHGB distributes nearly equally in soluble and membrane-bound forms, and both reconstitute highly selective anion channels in membrane (PMID: 37435575). The calculated molecular weight of Chromogranin B is at 78kDa.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 85438-4-RR (CHGB antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 85438-4-PBS in a different storage buffer formulation.

Biolayer interferometry (BLI) kinetic assays of 85438-4-RR against Human CHGB were performed. The affinity constant is 1.95 nM.
