

For Research Use Only

PLCB3 Recombinant antibody, PBS Only

Catalog Number: 85786-1-PBS

Basic Information

Catalog Number:

85786-1-PBS

Concentration:

1 mg/ml

Source:

Rabbit

Isotype:

IgG

GenBank Accession Number:

BC142681

GeneID (NCBI):

5331

UNIPROT ID:

Q01970

Full Name:

phospholipase C, beta 3
(phosphatidylinositol-specific)

Calculated MW:

1234 aa, 139 kDa

Observed MW:

139-150 kDa

Purification Method:

Protein A purification

CloneNo.:

243045B8

Applications

Tested Applications:

WB, Indirect ELISA

Species Specificity:

human

Background Information

PLCB3 is a member of the phosphoinositide phospholipase C beta enzyme family that catalyze the production of the secondary messengers diacylglycerol and inositol 1,4,5-triphosphate from phosphatidylinositol in G-protein-linked receptor-mediated signal transduction. Six subfamilies of PLCs (B, G, D, E, Z and H) constitute part of ubiquitous signaling cascades that translate hormonal signals into intracellular events, leading to alternations in cell function. PLCB isoforms 1-4 are stimulated by G-protein activation ($G_{\alpha q/11}$ and/or $G_{\beta \gamma}$). Independent of its enzymatic activity, PLCB3 inhibits the proliferation of hematopoietic stem cells (HSCs) and myeloid cells.

Storage

Storage:

Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:

PBS only, pH7.3

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 85786-1-RR (PLCB3 antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 85786-1-PBS in a different storage buffer formulation.
