

For Research Use Only

CPLX1 Recombinant antibody, PBS Only

Catalog Number: 85874-1-PBS

Basic Information

Catalog Number:

85874-1-PBS

Concentration:

1 mg/ml

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG0387

GenBank Accession Number:

BC002471

GeneID (NCBI):

10815

UNIPROT ID:

O14810

Full Name:

complexin 1

Calculated MW:

15 kDa

Observed MW:

15-20 kDa

Purification Method:

Protein A purification

CloneNo.:

250131A9

Applications

Tested Applications:

WB, Indirect ELISA

Species Specificity:

human, mouse, rat

Background Information

Complexin 1 (CPLX1) is a member of the complexin/syntaxin gene family, which are cytosolic proteins that function in synaptic vesicle exocytosis. Complexins are enriched in neurons where they colocalize with syntaxin and SNAP-25. Complexins bind weakly to syntaxin alone and not at all to synaptobrevin and SNAP-25, but strongly to the SNAP receptor-core complex composed of these three molecules. Complexins also compete with alpha-SNAP for binding to the core complex but not with other interacting molecules, including synaptotagmin I, and regulate the sequential interactions of alpha-SNAP and synaptotagmins with the SNAP receptor during exocytosis. CPLX1 binds to the SNAP receptor complex and disrupts it, leading to the release of transmitters. Alterations of complexins may contribute to the molecular substrate for abnormalities of neural connectivity in severe mental disorders.

Storage

Storage:

Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:

PBS only, pH7.3

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

SH-SY5Y cells were subjected to SDS PAGE followed by western blot with 85874-1-RR (CPLX1 antibody) at dilution of 1:20000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 85874-1-PBS in a different storage buffer formulation.

Various lysates were subjected to SDS PAGE followed by western blot with 85874-1-RR (CPLX1 antibody) at dilution of 1:20000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 85874-1-PBS in a different storage buffer formulation.
