Background Information

SPG20 (spastic paraplegia 20) gene encodes a multifunctional Spartin protein. SPG20 protein is highly expressed in adipose tissue and may be implicated in endosomal trafficking and microtubule dynamics. SPG20 is mutated in Troyer syndrome, a hereditary spastic paraplegia defined by degeneration of upper motor neurons, recent study showed that regulation of SPG20 on mitochondrial calcium homeostasis may contribute to the pathophysiology of Troyer syndrome. Hypermethylation of SPG20 promoter, found in colorectal cancer patients, may play a role in cytokinesis arrest in colorectal tumorigenesis.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 85938-2-RR (Sparti/SPG20 antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 85938-2-PBS in a different storage buffer formulation.

Biolayer interferometry (BLI) kinetic assays of 85938-2-RR against Human Sparti/SPG20 were performed. The affinity constant is 1.66 nM.
