Background Information

RSPO1, also named R-spondin-1, Activator of the canonical Wnt signaling pathway by acting as a ligand for LGR4-6 receptors. Acts as a ligand for frizzled FZD8 and LRP6. May negatively regulate the TGF-beta pathway. Has a essential role in ovary determination. Regulates Wnt signaling by antagonizing DKK1/KREM1-mediated internalization of LRP6 through an interaction with KREM1. RSPO1 seems to mainly localize to nucleoli (PMID:17804805).

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 86039-2-RR (RSP01 antibody) at dilution of 1:2000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 86039-2-PBS in a different storage buffer formulation.
