For Research Use Only

GYG1 Recombinant antibody, PBS Only

Catalog Number:86056-1-PBS

Basic Information

Catalog Number: 86056-1-PBS

Concentration: 1 mg/ml

BC031096 GeneID (NCBI):

GenBank Accession Number:

GeneID (NC 2992

Source: UNIPROT ID:
Rabbit P46976

Isotype: Full Name:
IgG glycogenin 1

Immunogen Catalog Number: Calculated MW:
AG3583 350 aa, 39 kDa

Observed MW: 39 kDa Pui

Purification Method: Protein A purification

CloneNo.:

250590C9

Applications

Tested Applications: WB, Indirect ELISA Species Specificity:

human

Background Information

The GYG1 gene encodes glycogenin-1, a core protein in muscle glycogen particles. GYG1 is a glycosyltransferase that forms a short glucose polymer of approximately 10 glucose residues by autoglucosylation (PMID: 25272951). Cardiomyopathy and muscle weakness associated with muscle glycogen depletion can also be caused by impaired priming of glycogen synthesis due to inactivation of muscle glycogenin (glycogenin-1) (PMID: 20357282).

Storage

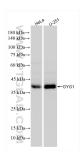

Storage:

Store at -80°C.

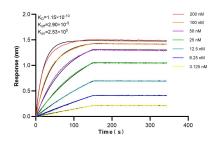

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

PBS only, pH7.3

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 86056-1-RR (GYG1 antibody) at dilution of 1:3000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 86056-1-PBS in a different storage buffer formulation.

Biolayer interferometry (BLI) kinetic assays of 86056-1-RR against Human GYG1 were performed. The affinity constant is 0.115 nM.
