For Research Use Only

RRM1 Recombinant antibody

Catalog Number:86135-1-RR

Purification Method:

Protein A purification

Recommended Dilutions:

WB: 1:2000-1:10000 IF/ICC: 1:200-1:800

CloneNo.:

250707E6

Basic Information

Catalog Number: GenBank Accession Number: 86135-1-RR BC006498

GeneID (NCBI): Concentration: 1000 $\,\mu$ g/ml 6240 **UNIPROT ID:** Source: Rabbit P23921

Full Name: Isotype: ribonucleotide reductase M1

Calculated MW: Immunogen Catalog Number:

AG0789 90 kDa Observed MW:

90 kDa

Applications

Tested Applications: Positive Controls:

WB, IF/ICC, ELISA WB: HeLa cells, A431 cells, HEK-293 cells, K-562 cells, Species Specificity:

A549 cells

human IF/ICC : HeLa cells,

Background Information

Ribonucleoside-diphosphate reductase functions as a heterodimer of a large and a small subunits in $deoxyribonucle otide synthesis. \ RRM1 constitutes to the large subunit (R1) of ribonucle otide reductase, and it can be also considered to the large subunit (R2) of ribonucle otide reductase, and it can be also considered to the large subunit (R3) of ribonucle otide reductase, and it can be also considered to the large subunit (R4) of ribonucle otide reductase, and it can be also considered to the large subunit (R4) of ribonucle otide reductase, and it can be also considered to the large subunit (R4) of ribonucle otide reductase, and it can be also considered to the large subunit (R4) of ribonucle otide reductase, and it can be also considered to the large subunit (R4) of ribonucle otide reductase, and it can be also considered to the large subunit (R4) of ribonucle otide reductase, and it can be also considered to the large subunit (R4) of ribonucle otide reductase, and it can be also considered to the large subunit (R4) of ribonucle otide reductase, and the large subunit (R4) of ribonucle otide reductase, and the large subunit (R4) of ribonucle otide reductase, and the large subunit (R4) of ribonucle otide reductase, and the large subunit (R4) of ribonucle otide reductase, and the large subunit (R4) of ribonucle otide reductase, and the large subunit (R4) of ribonucle otide reductase, and the large subunit (R4) of ribonucle otide reductase, and the large subunit (R4) of ribonucle otide reductase, and the large subunit (R4) of ribonucle otide reductase reduc$ either form heterodimer with small subunit RRM or RRM2B(PMID:16376858). RRM1 provides the precursors necessary for DNA synthesis. RRM1 can not be detected in quiescent cells, while its mRNA and protein are present throughout the cell cycle in cycling cells(PMID:8188248). Researches showed that RRM1 is involved in carcinogenesis, tumor progression, and the resistance of non-small-cell lung cancer (NSCLC) to treatment. Low level expression of RRM1 in NSCLC is associated with poor survival (PMID:17314339).

Storage

Store at -20°C. Stable for one year after shipment.

PBS with 0.02% sodium azide and 50% glycerol, pH7.3

Aliquoting is unnecessary for -20°C storage

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 86135-1-RR (RRM1 antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours.

Immunofluorescent analysis of (-20°C Ethanol) fixed HeLa cells using RRM1 antibody (86135-1-RR, Clone: 250707E6) at dilution of 1:400 and CoraLite®488-Conjugated Goat Anti-Rabbit IgG(H+L) (SA00013-2).
