Background Information

Protein phosphatase 2 regulatory subunit B gamma, also known as PPP2R2C or B55-gamma, encodes a gamma isoform of the subunit B55 subfamily, which is a regulatory subunit of Protein phosphatase type 2A (PP2A) (PMID: 24126060). PPP2R2C has been identified as a potential tumor suppressor in several cancers, including prostate and brain cancers (PMID: 23493267, PMID: 24126060). The decreased expression of PPP2R2C is associated with tumor progression, metastasis, and poorer patient outcomes in prostate cancer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 86383-1-RR (PPP2R2C antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 86383-1-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffin-embedded human breast cancer tissue slide using 86383-1-RR (PPP2R2C antibody) at dilution of 1:500 (under 10x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 86383-1-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffin-embedded rat brain tissue slide using 86383-1-RR (PPP2R2C antibody) at dilution of 1:500 (under 20x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 86383-1-PBS in a different storage buffer formulation.
