

For Research Use Only

# Mouse IL-16 Recombinant monoclonal antibody, PBS Only

Catalog Number: 86421-1-PBS

## Basic Information

Catalog Number:	86421-1-PBS	GenBank Accession Number:	NM_010551.3	Purification Method:	Protein A purification
Source:	Rabbit	GeneID (NCBI):	16170	CloneNo.:	250058G12
Isotype:	IgG	UNIPROT ID:	Q54824-1		
Immunogen Catalog Number:	EG3127	Full Name:	interleukin 16		
		Calculated MW:	141 kDa		
		Observed MW:	66-72 kDa		

## Applications

### Tested Applications:

WB, IHC, Indirect ELISA

### Species Specificity:

mouse, rat

## Background Information

IL-16 is a pleiotropic cytokine that functions as a chemoattractant, a modulator of T cell activation, and an inhibitor of HIV replication. It is mainly produced by T lymphocytes but also by other immune cells, neuronal cells, fibroblasts and epithelial cells. The signaling process of this cytokine is mediated by CD4. IL-16 induces chemotaxis of CD4+ cells such as lymphocytes, eosinophils, and dendritic cells by ligating CD4 directly at a site distinct from other ligands. Among its multiple functions, IL-16 is a T cell chemoattractant involved in T helper cell inflammatory responses and the regulation of both T cell growth, and responsiveness to regulatory cytokines. The cytokine function is exclusively attributed to the secreted C-terminal peptide, while the N-terminal product may play a role in cell cycle control. Pro-IL-16 can be detected at about 80 kDa, and cleaved fragments can be detected at between 40 and 75 kDa.

## Storage

### Storage:

Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

### Storage Buffer:

PBS only, pH7.3

For technical support and original validation data for this product please contact:

W: ptgcn.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

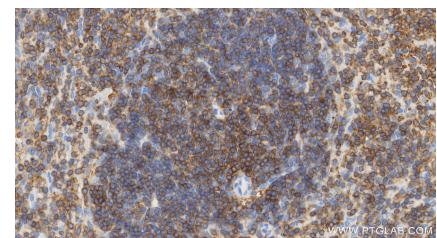

## Selected Validation Data

RAW 264.7 cells were subjected to SDS PAGE followed by western blot with 86421-1-RR (IL16 antibody) at dilution of 1:50000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 86421-1-PBS in a different storage buffer formulation.

Various lysates were subjected to SDS PAGE followed by western blot with 86421-1-RR (IL16 antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 86421-1-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffin-embedded mouse spleen tissue slide using 86421-1-RR (IL-16 antibody) at dilution of 1:1000 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 86421-1-PBS in a different storage buffer formulation.
