

For Research Use Only

PARD6B Recombinant monoclonal antibody

Catalog Number: 86786-1-RR

Basic Information

Catalog Number: 86786-1-RR	GenBank Accession Number: BC060847	Purification Method: Protein A purification
Source: Rabbit	GeneID (NCBI): 84612	CloneNo.: 251629D4
Isotype: IgG	UNIPROT ID: Q9BYG5	Recommended Dilutions: WB: 1:5000-1:50000
Immunogen Catalog Number: AG5083	Full Name: par-6 partitioning defective 6 homolog beta (C. elegans)	
	Calculated MW: 41 kDa	
	Observed MW: 52 kDa	

Applications

Tested Applications: WB, ELISA	Positive Controls:
Species Specificity: human, mouse, rat	WB: HeLa cells, PC-12 cells, Jurkat cells, HEK-293 cells, T-47D cells, Caki-1 cells, RAW 264.7 cells

Background Information

PARD6B (also named PAR6B) is a member of the PAR6 family. PAR6B is known to play a key role in mammary epithelial cell biology. Several studies have been reported which indicate deregulated PAR6B signaling contributes to malignant epithelial cell phenotypes due predominantly to disrupted polymerization and maintenance of tight junctions (PMID: 22957302). The approximately 4.8-kb long PAR6B mRNA was predominantly detected in both adult and fetal kidneys, while much weaker but significant signals were observed in the placenta, lung, and liver (PMID: 11260256). This antibody detects PAR6B with an apparent molecular weight of 50-53 kDa as has been demonstrated by several researches (PMID: 22496418; 25662318).

Storage

Storage:
Store at -20°C. Stable for one year after shipment.
Storage Buffer:
PBS with 0.02% sodium azide and 50% glycerol, pH7.3
Aliquoting is unnecessary for -20°C storage

T: 4006900926

E: Proteintech-CN@ptglab.com

W: ptgcn.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 86786-1-RR (PARDBB antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours.
