

For Research Use Only

Fibrinogen Alpha Chain Recombinant monoclonal antibody, PBS Only

Catalog Number: 86913-6-PBS

Basic Information

Catalog Number: 86913-6-PBS	GenBank Accession Number: BC020764	Purification Method: Protein A purification
Source: Rabbit	GeneID (NCBI): 2243	CloneNo.: 260891B12
Isotype: IgG	UNIPROT ID: P02671	
Immunogen Catalog Number: AG33674	Full Name: fibrinogen alpha chain	
	Calculated MW: 866 aa, 95 kDa	
	Observed MW: 95kDa, 70 kDa	

Applications

Tested Applications:
WB, IHC, Indirect ELISA

Species Specificity:
human

Background Information

Fibrinogen is a soluble plasma glycoprotein synthesized in the liver. It is composed of two sets of three structurally different subunits: alpha (FGA), beta (FGB), gamma (FGG). Fibrinogen is converted by thrombin into fibrin during blood coagulation. Fibrinogen and fibrin play overlapping roles in blood clotting, fibrinolysis, cellular and matrix interactions, the inflammatory response, wound healing, and neoplasia (PMID: 16102057). FGA is the alpha chain of fibrinogen. During conversion of fibrinogen to fibrin, fibrinopeptide A is cleaved from FGA by thrombin.

Storage

Storage:
Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:
PBS only, pH7.3

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

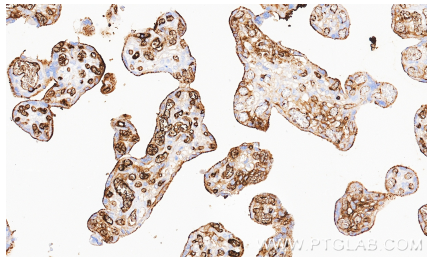

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 86913-6-RR (FGA antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 86913-6-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffin-embedded human kidney tissue slide using 86913-6-RR (Fibrinogen Alpha Chain antibody) at dilution of 1:1000 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 86913-6-PBS in a different storage buffer formulation.

Immunohistochemical analysis of paraffin-embedded human placenta tissue slide using 86913-6-RR (Fibrinogen Alpha Chain antibody) at dilution of 1:1000 (under 40x lens). Heat mediated antigen retrieval with Tris-EDTA buffer (pH 9.0). This data was developed using the same antibody clone with 86913-6-PBS in a different storage buffer formulation.
