Background Information

CCL20, also known as macrophage infiltrating factor protein 3 α , is a C-C chemokine that specifically binds to the receptor CCR6. CCL20 is produced in various tissues and by a wide range of immune cells, including neutrophils, natural killer cells, T-helper type 17 (Th17) cells, B cells, and various antigen-presenting cells, such as dendritic cells (DCs), Langerhans cells, and macrophages. Increased expression of CCL20 is likely involved in the increased recruitment of dendritic cells observed in fibroinflammatory diseases such as chronic obstructive pulmonary disease (COPD). CCL20 expression is increased by the proinflammatory cytokine IL-1 beta.

Selected Validation Data

Non-transfected and mouse CCL20/MIP-3 alpha-transfected HEK-293 cells were subjected to SDS PAGE followed by western blot with 86916-1-RR (Ccl20 antibody) at a dilution of 1:2000, incubated at room temperature for 1.5 hours.

Biolayer interferometry (BLI) kinetic assays of 86916-1-RR against Mouse CCL20/MIP-3 alpha were performed. The affinity constant is 0.446 nM.
