Background Information

SLC6A20 also known as XT3, SIT1, belongs to the family of solute carrier 6, mediating the transport of neutral amino acids from the extracellular milieu toward cell or storage vesicles utilizing an electric membrane potential as the driving force. SLC6A20 is expressed in the kidney and small intestine and is localized in the brush marginal membrane of the proximal renal tubules (PMID: 16174864). Mutations in SLC6A20 are associated with Hyperglycinuria and Iminoglycinuria (PMID: 19033659)

Selected Validation Data

HEK-293 cells were subjected to SDS PAGE followed by western blot with 87227-1-RR (SLC6A20 antibody) at dilution of 1:5000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 87227-1-PBS in a different storage buffer formulation.

Biolayer interferometry (BLI) kinetic assays of 87227-1-RR against Human SLC6A20 were performed. The affinity constant is 1.33 nM.
