

For Research Use Only

p70(S6K) Recombinant monoclonal antibody, PBS Only

Catalog Number: 87391-2-PBS

Basic Information

Catalog Number: 87391-2-PBS	GenBank Accession Number: BC053365	Purification Method: Protein A purification
Source: Rabbit	GeneID (NCBI): 6198	CloneNo.: 252761D7
Isotype: IgG	UNIPROT ID: P23443	
Immunogen Catalog Number: AG5883	Full Name: ribosomal protein S6 kinase, 70kDa, polypeptide 1	
	Calculated MW: 59 kDa	
	Observed MW: 65-75 kDa	

Applications

Tested Applications:
WB, Indirect ELISA

Species Specificity:
human, mouse, rat

Background Information

RPS6KB1 (Ribosomal protein S6 kinase beta-1) is also named as STK14A, p70 S6KA, and belongs to the S6 kinase subfamily. RPS6KB1 is a major substrate of mTOR and acts as a crucial effector of mTOR signaling pathway. It plays a key role in cell growth and proliferation by regulating INS sensitivity, metabolism, protein synthesis, and cell cycle. RPS6KB1 may play an important role in the progression of HCC and could serve as a potential molecular target for HCC therapy (PMID:22684641). The Rps6kb1 gene encodes the 70 kDa ribosomal protein S6 kinase (p70S6K). The PI3K/mTOR signalling pathway is one of the major mechanisms for controlling cell survival, proliferation, and metabolism and is the central regulator of translation of some components of the protein synthesis system. Due to alternative translation, two isoform S6K1 proteins are known to exist in mammalian cells: p85 S6K1 and p70 S6K1, which is identical to p85 S6K but lacks its first 23 amino acids. In addition, mammalian cells express a second S6K1 isoform spanning 316 amino acids (p31 S6K1).

Storage

Storage:
Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:
PBS only, pH7.3

W: ptgcn.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 87391-2-RR (p70(S6K) antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 87391-2-PBS in a different storage buffer formulation.

Biolayer interferometry (BLI) kinetic assays of 87391-2-RR against Human p70(S6K) were performed. The affinity constant is below 1 pM.
