

For Research Use Only

IFNA14 Recombinant monoclonal antibody, PBS Only

Catalog Number:87828-1-PBS

Basic Information

Catalog Number: 87828-1-PBS	GenBank Accession Number: BC074956	Purification Method: Protein A purification
Source: Rabbit	GeneID (NCBI): 3448	CloneNo.: 252962C1
Isotype: IgG	UNIPROT ID: P01570	
Immunogen Catalog Number: EG5295	Full Name: interferon, alpha 14	
	Observed MW: 23 kDa	

Applications

Tested Applications:
WB, Indirect ELISA

Species Specificity:
human

Background Information

IFNA14 (Interferon α -14) is a type I interferon encoded by a gene located on chromosome 9 (9p21.3). It is mainly produced by macrophages and other cells. By binding to interferon receptors (IFNAR), it initiates signaling pathways such as JAK-STAT, playing a crucial role in antiviral immunity (especially against HIV-1), tumor occurrence, and immune regulation.

Storage

Storage:
Store at -80°C.
The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:
PBS only, pH7.3

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Recombinant protein were subjected to SDS PAGE followed by western blot with 87828-1-RR (IFNA14 antibody) at dilution of 1:4000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 87828-1-PBS in a different storage buffer formulation.

Transfected with IFNA14 HEK-293T cells were subjected to SDS PAGE followed by western blot with 87828-1-RR (IFNA14 antibody) at dilution of 1:4000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 87828-1-PBS in a different storage buffer formulation.

Bi-layer interferometry (BLI) kinetic assays of 87828-1-RR against Human IFNA14 were performed. The affinity constant is 2.40 nM.
