

For Research Use Only

Gamma Tubulin Recombinant monoclonal antibody, PBS Only

Catalog Number: 87860-2-PBS

Basic Information

Catalog Number:

87860-2-PBS

Source:

Rabbit

Isotype:

IgG

Immunogen Catalog Number:

AG7070

GenBank Accession Number:

BC000619

GeneID (NCBI):

7283

UNIPROT ID:

P23258

Full Name:

tubulin, gamma 1

Calculated MW:

51 kDa

Observed MW:

50-55 kDa

Purification Method:

Protein A purification

CloneNo.:

253500C11

Applications

Tested Applications:

WB, IF/ICC, Indirect ELISA

Species Specificity:

human, mouse, rat

Background Information

Gamma tubulin is a member of tubulin superfamily and is a key component required for microtubule nucleation and stabilization. It is concentrated at the pericentriolar material of centrosomes in interphase cells, predominantly on spindle poles in mitotic cells, while found in midbodies during cytokinesis. Overexpression of gamma tubulin has been found in various cancers including breast cancer and gliomas. This antibody can well label the centrosome structure.

Storage

Storage:

Store at -80°C.

The product is shipped with ice packs. Upon receipt, store it immediately at -80°C

Storage Buffer:

PBS only, pH7.3

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 87860-2-RR (tubulin-gamma antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours. This data was developed using the same antibody clone with 87860-2-PBS in a different storage buffer formulation.

Immunofluorescent analysis of (-20°C Ethanol) fixed A431 cells using tubulin-gamma antibody (87860-2-RR, Clone: 253500C11) at dilution of 1:400 and CoraLite® 488-Conjugated Goat Anti-Rabbit IgG(H+L) (SA00013-2). This data was developed using the same antibody clone with 87860-2-PBS in a different storage buffer formulation.

Biolayer interferometry (BLI) kinetic assays of 87860-2-RR against Human Gamma Tubulin were performed. The affinity constant is below 1 pM.
