

For Research Use Only

HKDC1 Recombinant monoclonal antibody

Catalog Number:87988-1-RR

Basic Information

Catalog Number: 87988-1-RR	GenBank Accession Number: BC110504	Purification Method: Protein A purification
Source: Rabbit	GeneID (NCBI): 80201	CloneNo.: 253509B11
Isotype: IgG	UNIPROT ID: Q2TB90	Recommended Dilutions: WB: 1:5000-1:50000
Immunogen Catalog Number: AG23045	Full Name: hexokinase domain containing 1	
	Calculated MW: 917 aa, 103 kDa	
	Observed MW: 102 kDa	

Applications

Tested Applications: WB, ELISA	Positive Controls: WB : AsPC-1 cells, Caki-1 cells, A549 cells
Species Specificity: human	

Background Information

HKDC1 (Hexokinase Domain Containing 1), encodes a 917-amino-acid protein with a molecular weight of approximately 102.5 kDa (102,545 Da). The protein is widely expressed, with higher expression in tissues such as the duodenum, small intestine, kidney, and colon, and primarily localizes to the cytoplasm and mitochondria. HKDC1 functions as a hexokinase that catalyzes the phosphorylation of hexose sugars, albeit at very low levels compared to other hexokinases. It plays a role in glucose metabolism and homeostasis, and is required to maintain whole-body glucose homeostasis during pregnancy. Additionally, HKDC1 is involved in coordinating mitochondrial and lysosomal homeostasis, which is critical for preventing cellular senescence.

Storage

Storage:
Store at -20°C. Stable for one year after shipment.
Storage Buffer:
PBS with 0.02% sodium azide and 50% glycerol, pH7.3
Aliquoting is unnecessary for -20°C storage

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

Various lysates were subjected to SDS PAGE followed by western blot with 87988-1-RR (HKDC1 antibody) at dilution of 1:10000 incubated at room temperature for 1.5 hours.
