For Research Use Only

Anti-Rat IFN-gamma Rabbit Recombinant Antibody

Catalog Number: 98001-1-RR

Basic Information

Catalog Number: 98001-1-RR

Concentration: 100ug, 1000 ug/ml

Source: Rabbit Isotype: GenBank Accession Number:

NM_138880 GeneID (NCBI): 25712 UNIPROT ID:

Full Name: interferon gamma

Calculated MW: 18 kDa

P01581

Purification Method: Protein A purification

CloneNo.: 6K20

Applications

Tested Applications:

FC (Intra)

Species Specificity:

rat

Background Information

Interferon-gamma (IFN γ), is a type II interferon that provides immunity against bacterial, viral and protozoan infections. It is produced by a number of immune cell types including natural killer cells, natural killer T cells, and effector lymphocyte T cells following antigenic and inflammatory triggers. The IFN γ dimer binds to its cognate receptor which has two subunits: IFN- γ R1 which is the ligand-binding chain (α chain) and IFN- γ R2, the signal-transducing chain (β chain). Binding to the receptor activates the JAK/STAT pathway which in turn activates IFN γ responsive genes. While IFN γ can inhibit viral replication, it also works as an immune-modulator and immune-stimulator by increasing surface expression of class I MHC proteins (PMID: 19268625; 10688427)

Storage

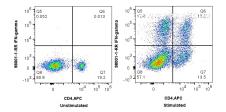

Storage:

Store at 2-8°C. Stable for one year after shipment.

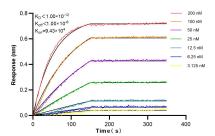

Storage Buffer:

PBS with 0.09% sodium azide.

Selected Validation Data

1X10^6 unstimulated or ConA, PMA and ionomycin stimulated (in the presence of protein transport inhibitors) Wistar rat splenocytes were intracellularly stained with 0.25 ug Anti-Rat IFN-gamma (98001-1-RR, Clone: 6K20) and PE-conjugated Goat anti-Rabbit IgG (H+L) Secondary Antibody. Cells were co-stained with 0.25 ug APC Anti-Rat CD4 (0X-35) (APC-65179, Clone: 0X-35). Cells were fixed with 4% PFA and permeabilized with Flow Cytometry Perm Buffer (PF00011-

Biolayer interferometry (BLI) kinetic assays of 98001-1-RR against Rat IFN-gamma were performed. The affinity constant is below 1 pM.
