| Background Information | EPCR, also known as CD201, protein C receptor (PROCR), or activated protein C receptor (APC receptor), is a transmembrane glycoprotein. EPCR promotes the activation of protein C, which has anticoagulant and cytoprotective effects. EPCR facilitates the activation of protein C by the thrombin-thrombomodulin complex but also facilitates APC-mediated cytoprotective effects on cells that involve the activation of protease-activated receptors (PAR) 1 and 3(PMID: 27207424). |   |   |
| Storage                | Storage:<br>Store at -80°C.<br>The product is shipped with ice pack<br>Storage Buffer:<br>PBS Only  | s. Upon receipt, store it immediately a       | t -80°C                                       |
|                        |   |   |   |

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

## Selected Validation Data

1x10<sup>^6</sup> bEnd.3 cells were surface stained with 0.25 ug Anti-Mouse EPCR/CD201 Rabbit Recombinant Antibody (98248-1-RR, Clone: 241853A7) and PE-Conjugated Goat Anti-Rabbit IgG(H+L) (red), or 0.25 ug Rabbit IgG Isotype Control Recombinant Antibody (98136-1-RR, Clone: 240953C9) and PE-Conjugated Goat Anti-Rabbit IgG(H+L) (blue). Cells were not fixed. This data was developed using the same antibody clone with 98248-1-PBS in a different storage buffer formulation.

Biolayer interferometry (BLI) kinetic assays of 98248-1-RR against Mouse EPCR/CD201 were performed. The affinity constant is 52.5 pM.
