Background Information

CD302 is a C-type lectin receptor involved in cell adhesion and migration, as well as endocytosis and phagocytosis. In mice and humans, CD302 is primarily expressed in the liver, lungs, lymph nodes (LNs), spleen, and bone marrow. In CD302 gene knockout (CD302KO) mice, the migration frequency and number of myeloid dendritic cells (mDC) in CD302KO lymph nodes were reduced compared to the wild type, confirming the functional role of CD302 in mDC migration.
