Background Information

CX3CL1, also known as fractalkine, is a transmembrane chemokine that acts as a ligand for both CX3CR1 and integrins α v β 3 and α 4 β 1 (PMID: 9479488; 23125415). CX3CL1 is expressed by many hematopoietic and nonhematopoietic cells, including macrophages, endothelial cells, neurons, and fibroblasts. It is involved in immune responses and inflammation (PMID: 21045240). CX3CL1 exists in a membrane-anchored molecule and a soluble form, generated by proteolytic cleavage (PMID: 11495925; 12714508).
