For Research Use Only

APC Anti-Mouse CD90.2 (30-H12)

Catalog Number: APC-65088 1 Publications

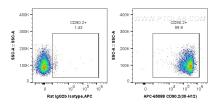

Basic Information	Catalog Number: APC-65088	GenBank Ad BC054436	ccession Number:	Purification Method: Affinity purification	
	Concentration: 100ug, 0.2 mg/ml	Genel D (NC 21838	BI):	CloneNo.: 30-H12	
	Source: Rat Isotype: IgG2b, kappa	UNIPROT IC P01831 Full Name:):	Recommended Dilutions: FC: 0.2 ug per 10^6 cells in 100 µ l suspension Excitation/Emission maxima wavelengths: 650 nm / 660 nm	
			antigen 1, theta		
Applications	Tested Applications:	FC FC : C57BL/6 mouse thymocytes, Species Specificity:			
	FC Species Specificity: Mouse				
Background Information	CD90 (Thy-1) is a 25 kDa, GPI-linked membrane glycoprotein that belongs to immunoglobulin superfamily (PMID: 6177036; 6153212). Originally described as a brain thymus cross-reactive antigen, it is found in large quantities on mouse and rat thymocytes and central nervous system cells (PMID: 83175). CD90 has been postulated to be involved in cellular recognition, adherence, and T cell activation (PMID: 7683034). Mouse CD90 (Thy-1) is defined as a differentiation alloantigen, represented as two serologically distinguishable allelic forms, designated CD90.1 (Thy-1.1) and CD90.2 (Thy-1.2) (PMID: 83175). CD90.2 is expressed by thymocytes, T cells, neurons and hematopoietic stem cells in most strains of mice (C3H, BALB/c, C57BL/6, DBA, and others), whereas CD90.1 is expressed in some mouse strains like AKR (PMID: 5919593).

For technical support and original validation data for this product please contact: E: Proteintech-CN@ptglab.com T: 4006900926 W: ptgcn.com

This product is exclusively available under Proteintech Group brand and is not available to purchase from any other manufacturer.

Selected Validation Data

1X10^6 C57BL/6 mouse thymocytes were surface stained with 0.2 ug APC Anti-Mouse CD90.2 (APC-65088, Clone: 30-H12) or 0.2 ug Isotype Control. Cells were not fixed.
