Recombinant human MYOT protein

Size: SQVRSRSTSRGDVNDQ 50 µ g DEGRFCRMDFKVSGLP4 Form: TVQLDVLAKEHKRAPMI Available lyophilized ISAIPPPKLFWKRNNEM Species: IKDVNKKDAGWYTVSA	
SD # g DEGRFCRMDFKVSGLP/ S0 # g MVSEKGLHSUFEVVR2 Form: TVQLDVLAKEHKRAPM Available lyophilized SAIPPKLEWKRNEW Species: IKDVNKKDAGWTVSA human QTLPAPKQLRVRPTFSK Expression Source: FQRLAAQSGLYESEEL <i>e coli-</i> derived, PGEX-4T, with N-terminal GST. (191-498 aa encoded the biological Activity: Not tested Endotxin Level: Please contact the lab for more information The product is shipped Qupon receipt, store it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). The product is shipped If a different concentration volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, genty pipet and wash down the sides of the vial to ensure full	GAQDSQQHNSEHARLQVPT
Biological Activity: NivSexGLHSLIFEVVRA Available lyophilized IXDVPKKAAPMI Species: IXDVPKKAAGWTVSA human QTLPAPKQLRVRPTFSK Expression Source: FQRLAAQSGLYESEEL e coli-derived, PGEX-4T, with N-terminal GST. (191-498 aa encoded the second	DAIQEKFYPPRFIQVPENMS
Form: TVQLDVLAKEHKRAPMI Available lyophilized ISAIPPPKLFWKRNEM Species: IKDVNKKDAGWTVSA human QTLPAPKQLRVRPTFSK Expression Source: FQRLAAQSGLVESEL e coli-derived, PGEX-4T, with N-terminal GST. GI91-498 aa encoded to Biological Activity: Not tested Endotoxin Level: Please contact the lab for more information Reconstitution: Reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). The product is shipped Upon receipt, store it in recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution vulume as required (please note: the ion concentration of the final solution will vary according to the volume used). Net: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full	APDVSWYLNGRTVQSDDLHK
Available lyophilized IVQUDVLAKENRAPM Species: ISAIPPRUFWKRNNEM human QTLPAPKQLRVRTVSA Expression Source: FQRLAAQSGLYESEEL e coli-derived, PGEX-4T, with N-terminal GST. [191-498 aa encoded the second the secon	
Species: IKDVNKKDAGWYTVSA human QTLPAPKQLRVRPTFSK Expression Source: FQRLAAQSGLYESEL e coli-derived, PGEX-4T, with N-terminal GST. (191-498 aa encoded backer) Biological Activity: Not tested Endotoxin Level: Please contact the lab for more information Please constitute at 0.25 µg/ µ l in 200 µ l sterile water for short- term storage. Shipping: After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). Shipping: If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full	
human QTLPAPKQLRVRPTFSK Expression Source: e coliderived, PGEX-4T, with N-terminal GST. Biological Activity: Not tested Endotoxin Level: Please contact the lab for more information Please constitution: Reconstitution: Reconstitution of Storage Reconstitution in the storage. After reconstitution of glycerol for long-term storage (see Stability and Storage for more details). The product is shipped Upon receipt, store it in recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). The different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full	
Expression Source: FQRLAAQSGLYESELL e coli-derived, PGEX-4T, with N-terminal GST. (191-498 aa encoded b) Biological Activity: Not tested Endotoxin Level: Please contact the lab for more information Reconstitution: Reconstitution: Reconstitute at 0.25 µg/µl in 200 µl sterile water for short-term storage. Shipping: After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full	YLALNGKGLNVKQAFNPEGE
e coli-derived, PGEX-4T, with N-terminal GST. (191-498 aa encoded b Biological Activity: Not tested Shipping: Please contact the lab for more information Shipping: Reconstitution: and Storage Reconstitution with sterile water for short- term storage. Shipping: After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Shipping: Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full Shipping:	
Not tested Endotoxin Level: Please contact the lab for more information Reconstitution: Reconstitute at 0.25 µg/ µ l in 200 µ l sterile water for short- term storage. After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). If a different concentration volume as required (please note: the ion concentration of the final solution will vary according to the volume used). The product is shipped Upon receipt, store it in recommended temper. Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full Shipping: The product is shipped Upon receipt, store it in recommended temper.	by BC005376)
Please contact the lab for more information Reconstitution and Storage Reconstitution: Reconstitute at 0.25 µg/µl in 200µl sterile water for short- term storage. After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full Shipping: The product is shipped Upon receipt, store it in recommended temper.
