			Endotoxin Level: Please contact the lab for more information	
			Reconstitution and Storage	Reconstitution: Reconstitute at 0.25 µg/ µ l in 200 µ l sterile water for short- term storage. After reconstitution with sterile water, if glycerol has no effect on subsequent experiments, it is recommended to add an equal volume of glycerol for long-term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full
	Purity	recovery of the protein into solution. 85%, by SDS-PAGE with Coomassie Brilliant Blue staining.		
Formulation	The purified protein was Lyophilized from sterile PBS (58mM Na2	HPO4 17mM NaH2PO4 68mM NaCL pH8) 5 %		
Formulation	trehalose and 5 % mannitol are added as protectant before lyoph	• •		
Stability and Storage	Store for up to 12 months at -20°C to -80°C as lyophilized powder.			
Storage of Reconstituted Protein	Short Term Storage: Store at 2-8°C for (1-2 weeks). Long Term Storage: Aliquot and store at -20°C to -80°C for up to 3 months, buffer containing 50% glycerol is recommended for reconstitution. Avoid repeat freeze-thaw cycles.			
Selected Validation Data				
	66 kDa→ 43 kDa→ 43 kDa→			
	28 kDa
